Artwork:

Electronic emailed art files are the preferred method of receiving artwork. All graphics and fonts should be vectored and files converted for use on MS Windows platform. We will accept the following vector file extensions: .CDR-CorelDraw, .EPS-Encapsulated Postscript, or .PDF-Adobe Acrobat. If sending from a Windows platform, use CorelDraw X3 or before. If sending from a Macintosh platform, use Illustrator CS3 or before.

Artwork that is not suitable for our set up process is subject to cleanup at a rate of \$40.00 (v) per hour. With your properly vectored art file and clear instructions for layout, we will provide the first sketch and one (1) revision at no charge. Additional revisions will be done at a rate of \$25.00 (v) each.

Proof Approval:

Please check the following: size, plastic color, print color and attachment. Berlekamp Plastics, Inc. is not responsible for errors or omissions after the proof has been approved and the order acknowledged.

Size Calculation:

All custom design items are priced by size, not by design. To calculate the size, measure the height and multiply it by the length to calculate the square inch area.

Extra Raised Color Charges:

There is no limit to the number of spot colors that can be designed into our product. Spot colors require approximately 1/16" separation between colors. Flat printing has some line width and detail limitations.
